

## Pause Menu

- Good in general
- Switches between GS-factory & GS-Apartment
- Goal: Add a Save button to Save Progress between these Scores

## Saving Feature

- Still in-progress
- Using "Easy Save 3," which is a popular Unity Package (paid! \$\$\$) with a great API.
- Might be able to do saving directly to a file.
  - ↳ could do something like an Excel File to store / load data
